Introduction

This guideline provides recommendations for the preparation and display of food intended for sale at temporary food markets.

The following principles should be maintained at all times:

- Vendors of higher risk foods must contact their local Health Authority and submit an application before commencement of sales (see Appendix IV).
- Vendors of lower risk foods are not required to submit an application before commencement of sales. It is the vendor's and the market manager's responsibility to ensure that all lower risk foods meet the definition of a lower risk food.
- Public health is protected by ensuring that food prepared at home which is offered for sale at temporary food markets is limited to lower risk foods (see Appendix I for examples).
- The Health Authority has discretion to remove any food sold at a temporary food market considered to be a health hazard as defined in Section 1 of the *Public Health Act*, or is contaminated as per Section 3 of the *Food Safety Act*.
- Municipal zoning and business license issues are respected, and are an integral part of the approval process for temporary food markets.

Background

The Food Premises Regulation (BC Reg. 210/99), pursuant to the *Public Health Act*, allows for the sale of the following foods at temporary food markets:

- whole fresh fruits or vegetables, or
- home-prepared, prepackaged, non-potentially hazardous foods listed in Appendix I.

This does not mean you can sell this food from home, or at retail/commercial food stores. Applicants should discuss requirements for retail/commercial sale with their local Health Authority.

Definitions

Temporary Food Market Manager - means, for the purposes of this guideline, the person designated as being in charge of the overall market operation. Market managers are responsible for ensuring that food vendors of higher risk foods have obtained approval from the local Health Authority in addition to the other responsibilities as outlined in Section III of this guideline.

Temporary Food Markets - means for the purpose of this guideline, a food establishment operated in a fixed location on a temporary basis in connection with a charitable or public event, farmers market or other event of a like nature.

Higher Risk Food - means food in a form or state which is capable of supporting growth of disease causing microorganisms, or the production of toxins.

Vendors must not sell foods that are considered higher risk unless approved to do so by the local Health Authority.

Lower Risk Food - means food in a form or state that is not capable of supporting the growth of disease-causing organisms or the production of toxins. One or more of the following factors usually apply to these foods:

- ✓ Water activity (A_w) of 0.85 or less, or
- ✓ A pH (Hydrogen ion concentration) value of 4.6 or less.

There can be occasions that a food, even with a pH and/or an A_w as described above for lower risk foods, may still be considered a higher risk food due to the source of the food, how it is processed, and/or some other mitigating risk factors.

Vendors of home prepared foods at temporary food markets must only sell foods that are considered to be lower risk (see Appendix I for examples). Vendors are allowed to sell home-prepared lower risk foods at temporary food markets without contacting or receiving approval by the local Health Authority.

Sanitize - means to use heat or chemicals to reduce the micro-organisms on a surface by 99.99%.

Guideline

I. Preparation of Lower Risk Food in the Home

Where home preparation of lower risk food is proposed for sale at temporary food markets, it is recommended that vendors/food handlers ensure that

1. Food is in good condition and free from spoilage.
2. Tests are undertaken to verify that a food product is not higher risk. These tests should verify the food has:

- ✓ a water activity (A_w) of 0.85 or less, or
- ✓ a pH (Hydrogen ion concentration) value of 4.6 or less

A list of commercial food testing laboratories that may be capable of testing your food can be found in Appendix VII.

3. Food is protected from contamination. Pets should be excluded from kitchens during the time food is being prepared.
4. Food is prepared in well-equipped kitchens. Food contact surfaces, utensils and equipment are cleaned and sanitized prior to beginning food preparation and after each use.
5. Good personal hygiene is observed including:
 - a) washing hands frequently and thoroughly including before starting food preparation, after using the toilet and after handling raw food. Soap in a dispenser and paper towels should be used for hand washing and drying.
 - b) avoiding coughing and sneezing while handling food; when unavoidable cover your nose and mouth and wash hands thoroughly afterwards.
 - c) avoiding food preparation if you are ill or someone in the home is ill.
 - d) wearing clean clothing and an apron when preparing food.
6. Lower risk food is prepared separately from higher risk foods and other potential sources of contamination.
7. Food is wrapped or packaged to preclude contamination.
8. If foods are packed in jars:
 - a) only proper sealing jars (e.g. Mason-type) should be used,
 - b) jars may be refilled only if they are in good condition, cleaned and properly sanitized before reuse,
 - c) sealing rings and lids should not be reused; they should be replaced with new rings and lids with each refill, and
 - d) jams and jellies should be processed in boiling water. The seal should be airtight to prevent the entry of spoilage organisms.

NOTES – Lower Risk Foods:

1. *The sale of lower risk foods at temporary food markets does not automatically confer approval for sale at retail/commercial food stores. Applicants should discuss requirements for retail/commercial sale with their local Health Authority.*
2. *Regarding testing to verify that a food product is not higher risk:*
 - a. *When the Health Authority requires a food product to be tested, such testing should be conducted at a commercial food testing laboratory a list of which is found in Appendix VII.*
 - b. *Self testing can be conducted during recipe development and for monitoring quality control*
 - c. *When the recipe for a food product is changed, the food product should be re-tested to verify the product continues to be a lower risk food.*
 - d. *For vendors which produce a variety of similar products using a similar recipe but different ingredients (e.g. different jams made from different fruit), if testing is required, permission may be granted by the local Health Authority to only test the finished products which would be considered highest risk. In the example above, the jam made from the fruit with the highest pH would be considered the highest risk food product.*
 - e. *As part of an ongoing quality control program, vendors selling several products are encouraged to test a variety of different products annually.*
3. *While not mandatory, it is strongly recommended that vendors involved in home food preparation of lower risk food complete the MarketSafe food handlers' training program or other approved food safety training program such as FOODSAFE Level 1.*
4. *Vendors of lower risk foods are not required to contact their local Health Authority or submit an application before commencement of sales. However, it is the vendor's responsibility to ensure that all lower risk foods meet the definition of a lower risk food, namely:*
 - ✓ *a water activity (A_w) of 0.85 or less, or*
 - ✓ *a pH (Hydrogen ion concentration) value of 4.6 or less*

It is the vendor's responsibility to provide evidence that a food is a lower risk food if such evidence is requested by their Market Manager or their local Health Authority.

II. Conditions for Sale of Lower Risk Food at Temporary Food Markets

It is recommended that vendors of home prepared foods at temporary food markets ensure that, when selling lower risk food:

1. Food handlers observe good personal hygiene, including wearing clean attire and washing hands before handling food or after handling money. Wearing of disposable gloves when handling food or money is recommended, gloves should be changed between activities.
2. A sign is displayed that is clearly visible to the consumer at the point of sale stating that “THIS FOOD HAS BEEN PREPARED IN A KITCHEN THAT IS NOT INSPECTED BY A REGULATORY AUTHORITY.” or equivalent wording.
3. Food products should be protected from sources of contamination at all times, including contact by pets, during storage and display at the market. Foods should not be stored in direct contact with the ground.
4. Display cases, counters, shelves, tables, and any other equipment used in connection with the sale of lower risk food should be made from easily cleanable material, maintained in good condition and, cleaned and sanitized as often as necessary.
5. A satisfactory means of cleaning hands and utensils (when used by a vendor), should be provided as per the following:
 - a) the use of hand wipes is satisfactory where only prepackaged food or whole fresh fruits and vegetables are sold
 - b) if samples/product tasting is undertaken then running water, soap in a dispenser and paper towels should be provided; a 22.7 liter (5 gal) plastic water jug with spigot is generally acceptable as the water source

Suggested alternative to satisfy hand washing may include:

Vendors operating side-by-side may share a washing station consisting of liquid soap in a dispenser, single use towels, a container which holds a minimum 22.7 liters (5 gallons) of water, and a suitable waste holding receptacle

6. In order to minimize direct food handling at the market, with the exception of fresh fruits and vegetables, food samples intended for tasting at the market should be portioned and packed at the home kitchen. At the market, food samples for tasting should be individually portioned (e.g. in paper cups, on toothpicks) and not offered as bulk items.

Home prepared/packaged food may be subject to Canadian Food Inspection Agency and Health Canada requirements for allergens, labeling, weights and measures. Vendors are advised to check with their local CFIA office to ensure their packages/labels comply with applicable federal requirements.

Food Labelling for Industry Toolkit available at:

<http://www.inspection.gc.ca/food/labelling/food-labelling-for-industry/eng/1383607266489/1383607344939>

III. Market Managers of Temporary Food Markets

A market manager (or equivalent) should be designated as being in charge of the overall market operation. Market managers are responsible for ensuring that food vendors have obtained approval from the local Health Authority for the sale of higher risk foods, and not allow sales by vendors unless they have produced a Letter of Confirmation (see examples – Appendix V) or a copy of their Permit/Licence to operate.

Other responsibilities of market managers should include:

1. Obtaining approval from local/regional government to ensure compliance with local health, zoning, by-law and business license requirements.
2. Prior to the sale of foods identified in Appendix II and III, it is the responsibility of each vendor to contact the local Health Authority. This includes the submission of applications (see example -Appendix IV) within time deadlines established by the local Health Authority. Generally, applications should be submitted at least 30 days prior to commencement of the market/sales. The Health Authority where the facility is located and produces the food has jurisdiction and is responsible for issuing a letter of confirmation (see example - Appendix V) for all approved applications.

Letters of confirmation and copies of the Permit/Licence to operate will be honored between Health Authorities and events. Vendor applications, once accepted, are not required to be resubmitted to another Health Authority for additional events/locations. However, it is essential that the letter of confirmation or a copy of the vendor Permit/Licence to operate be shown to each Market Manager as part of the event approval process.

Vendors are strongly encouraged to have in their possession a copy of the confirmation letter or a copy of their Permit/Licence to operate and any product documentation during any sales event to verify that the products have been reviewed and accepted by the Health Authority with jurisdiction for that region.

Letters of confirmation or copies of their Permit/Licence to operate do not have an expiry date. However, acceptance is conditional to no changes being made to the process or composition of the approved food(s). Applicants should re-apply to a Health Authority in the prescribed format if any changes are made to the process or composition of the food(s), or for any new foods proposed for sale.

Vendors who sell ONLY fresh whole fruits and vegetables or lower risk foods (Appendix I foods) are not required to submit an application, and do not require a letter of confirmation or a copy of their Permit/Licence to operate. Washing station(s) should, however, be supplied as per Section II.5 if samples are portioned/offered on site.

3. Being responsible for ensuring all vendors are aware of all relevant policies and guidelines.
4. Ensuring no home prepared, higher risk foods are sold or offered for sale.
5. Ensuring each vendor completes a list of foods to be sold.
6. Maintaining a written record of all vendors and foods sold, and have such records available for review by local Health Authority, upon request.
7. Being present and on-site at all times the market is in operation.
8. Ensuring each vendor provides an acceptable means of hand and utensil washing (see Section II.5).
9. Are recommended to have completed the FOODSAFE Level 1 Program or the MarketSafe program.

Contact your local Health Authority if you need more guidance.

IV. Chef Demonstrations and Similar Events

Chef demonstrations, and similar events, are defined as events where ready-to-eat foods are prepared prior to or at the temporary food market. The food is then distributed to the public and intended for immediate consumption. Chef demonstrations, or other similar events, will only be considered if a *Temporary Food Permit* is obtained prior to the event from the local Health Authority where the event will be located.

Appendix I - Lower Risk Foods

The following list contains examples of **lower risk foods** that may be **acceptable** for home preparation and sale at a temporary food market. For additional information on the definition of Lower Risk Foods, see Page 2.

*all of these lower risk foods should be prepackaged
except whole fresh fruits or vegetables*

- ✓ apple sauce
- ✓ bread and buns (no dairy or cheese fillings)
- ✓ brownies
- ✓ butter tarts
- ✓ cakes (icing sugar only, no dairy or synthetic whipped cream)
- ✓ chocolate/carob or raw chocolate/carob (provided it is used for re-melted or re-molded products only and (1) not purchased from bulk bins; (2) sourced from a chocolate manufacturer that can provide a certificate of assurance that chocolate is free from *Salmonella*).
- ✓ cinnamon buns (sugar icing only)
- ✓ cookies
- ✓ dried fruits
- ✓ dry cereal products
- ✓ fresh fruits and vegetables
- ✓ fudge
- ✓ hard candy
- ✓ honey
- ✓ jam and jelly (pH 4.6 or less or aw of 0.85 or less)
- ✓ microgreens
- ✓ muffins (no dairy fillings)
- ✓ noodles (dry flour and water only, no egg based)
- ✓ pickled vegetables (vinegar base, pH 4.6 or less)
- ✓ pies (fruit filled only, no cream filled or cream based)
- ✓ popcorn
- ✓ relish (vinegar base, pH 4.6 or less)
- ✓ salsa (contains no animal protein)
 - pH 4.6 or less if the product is made with fresh tomatoes and is thermally processed
 - pH 4.2 or less if the product is made with fresh tomatoes and is NOT thermally processed
- ✓ syrup
- ✓ toffee
- ✓ wine and herb vinegar

For products not listed above, please consult your local Health Authority.

Appendix II - Higher Risk Foods

The following list contains examples of **higher risk foods** that are **not acceptable** for home preparation and sale at a temporary food market.

- ✖ antipasto
- ✖ cabbage rolls
- ✖ cakes/pastries with whipped cream, cheese or synthetic fillings
- ✖ chop suey
- ✖ creamed corn
- ✖ dairy products (e.g. milk, cream, cheese, yogurt)
- ✖ fermented foods (any food that relies on the growth of micro-organisms to produce alcoholic, acidic or alkaline conditions necessary for fermentation)
- ✖ fish and shellfish
- ✖ foods containing eggs as ingredients (e.g. custards, salads)
- ✖ garlic spreads, pesto
- ✖ guacamole
- ✖ herb and flavored oils
- ✖ hummus
- ✖ jam and jelly (pH 4.7 or higher or A_w of 0.86 or higher)
- ✖ juice (fruit and vegetable)
- ✖ perogies
- ✖ pickled eggs
- ✖ pickled vegetables (vinegar base, pH 4.7 or higher)
- ✖ pies (meat filled, pumpkin, sweet potato, custard [e.g., lemon meringue pie])
- ✖ processed beans, including baked, refried, and bean salad
- ✖ processed low acid vegetables (e.g. pH 4.7 or higher: beans, asparagus, beets, mushrooms, broccoli, peas)
- ✖ processed meat, sausages
- ✖ relish (vinegar base, pH 4.7 or higher)
- ✖ salsa containing animal protein
- ✖ salsa without animal proteins but with fresh tomatoes as an ingredient when the product is not thermally processed and the pH of the final product is greater than 4.2
- ✖ sprouted seeds (bean, alfalfa, mung, etc.)
- ✖ tofu
- ✖ whole or cut fresh tomatoes used as ingredient (unless acidified such that the pH of the final food is 4.2 or lower)

For products not listed above, please consult your local Health Authority.

NOTES – Higher Risk Foods:

1. *Consideration for the sale of higher risk foods may be given by the local Health Authority provided the food is prepared in an approved, commercial food premises.*
2. *For higher risk foods intended to be packaged aseptically in an air excluded container (canned), in addition to being prepared in an approved, commercial food premises, the process must be reviewed and accepted by a qualified Processing Authority. See Appendix VI for a list of qualified Processing Authorities in British Columbia.*
3. *Temporary Food Market vendors who also own/operate the food premises where the higher risk food is being prepared should have a copy of their Permit or License to Operate with them. Vendors who are not the owner/operator of the food premises where the higher risk food is being prepared should obtain a letter of confirmation (See Appendix V for example) from the Health Authority where the facility is located. The letter of confirmation specifies that the higher risk foods listed can be sold at a temporary food market.*
4. *Vendors should always have a copy of the letter of confirmation or Permit/License to Operate during any sales event to verify that the products have been prepared in an approved, commercial food premises and that the products have been reviewed and accepted by a Health Authority.*
5. *All vendors involved in the preparation of higher risk foods in an approved, commercial food premises must successfully complete the FOODSAFE Level 1 program or equivalent.*
6. *All higher risk foods must be maintained at 4°C or colder from the point of packaging through to sale to the consumer. Meat, poultry and fish products must be kept frozen as outlined in Appendix III.*

Appendix III - Sale of Shell Eggs and Raw Foods of Animal Origin at Temporary Food Markets

The sale of higher risk foods to the public requires that the premises in which the food is processed, packaged, and sold to the public comply with the *Food Premises Regulations*. Hence, home prepared higher risk foods are not permitted to be sold to the public at temporary food markets unless prepared and sold in facilities that have been approved and, in some cases, issued a permit pursuant to the *regulations*.

The above notwithstanding, the following criteria provide guidelines for the sale of shell eggs and other raw foods of animal origin at temporary food markets.

A. Shell Eggs

Shell eggs may be sold at temporary food markets subject to the following:

- ✓ Shells are sound and not cracked/leaking
- ✓ Shells are clean and free of any fecal material or feathers
- ✓ Eggs are maintained at an internal temperature of 4°C during transportation and storage/display at the market.
- ✓ Crates used to contain the eggs are clean and maintained in a sanitary manner.
- ✓ The minimum information on crates should indicate the name of farm/producer and the packaging or sale date.

B. Sale of Raw Meat, Poultry and Fish Products

1. The sale of whole, portioned or ground raw meat, poultry or fish products can be considered for sale at temporary food markets subject to the following:
 - ✓ All raw products should be frozen and kept frozen from the point of packaging through to sale to the consumer. All products not sold the day of the market should be kept frozen until return to the point of origin. Any products that have thawed should not be refrozen and sold at a future event.
 - ✓ All raw products should be processed and packaged at an approved food premises.
 - ✓ All raw products should be prepackaged – repackaging or reprocessing of any kind is not allowed at the temporary market site.
 - ✓ All raw products should be labeled to identify the processing plant (see Note 1 below), vendor contact information, product name, packaging date and notice to keep frozen
 - ✓ labels or signage should be provided which provides information on the safe handling/preparation procedures recommended for the product (e.g. cooking temperature for ground beef 71°C)
2. Vendors should submit an application to sell raw meat, poultry or fish products to the local Health Authority at least 30 days prior to the start of the market/sales.

As part of the application, vendors should submit a copy of the relevant licenses and a food safety plan for each of the raw products they wish to sell. The plan should include a list that describes the products. Generic terms such as beef, poultry should be avoided – describe the products more specifically such as roast, steaks, ground beef, hamburger, or chicken breasts.

The plan should also include information about processing and packaging procedures, transportation and selling provisions (**particularly the means of temperature control**), provisions for unsold products and storage outside of market location, and procedures for recall should a problem with the product arise.

NOTE 1: *All animals must be slaughtered and meat inspected at a plant licensed under either the federal or provincial Meat Inspection Regulations.*

NOTE 2: *Fish products sold anywhere in British Columbia must be processed and packaged under an appropriate regulatory authority, provincially under the Fish and Seafood Act and related Fish and Seafood Licensing Regulation, Food Safety Act and related Food Premises Regulation or federally under the Safe Food for Canadians Act. More information can be found on the Government of BC site: <https://www2.gov.bc.ca/gov/content/industry/agriculture-seafood/fisheries-and-aquaculture/seafood-industry-licensing>*

NOTE 3: *Should a vendor wish to sell refrigerated (unfrozen) meat or fish products, then all requirements of the BC Food Premises Regulations must be met. Vendors considering this must first contact their local Environmental Health Officer for more information regarding the feasibility of this option.*

3. Meat from Class D Rural Slaughter Establishments

All sales of meat from Class D rural slaughter establishments are limited to within the regional district in which the meat was produced. Meat from Class D meat plants is **PROHIBITED** to be sold in areas outside of the regional district in which the meat was produced. In addition to the requirements outlined in these Guidelines, the sale of meat from Class D meat plants must meet all requirements of the *BC Meat Inspection Regulation*, including:

- a) Class D meat must be labeled:
 - i. Not Government Inspected. For sale and use only in the regional district of *<insert the name of regional district in which the farm is located>*.
- b) In addition, the following information must also be included on the label:
 - i. The slaughter establishment must be identified including the name and address of the farm or facility and the licence number issued to the farm or facility.
 - ii. If a cut and wrap operation is used to further process the meat, it must also be identified.
 - iii. A description of the contents, including the date that the product was packaged
 - iv. A net weight or volume.
- c) A copy of the Class D licence is posted or readily available to customers.

Records of all sales of Class D meat must be kept. These records are critical for demonstrating that licence conditions are being followed, and to ensure that clients can be easily contacted in the case of a product recall. Copies of all invoices should also be kept to verify information in the sales record. Critical information to record includes:

- ✓ Type of product
- ✓ Date of sale
- ✓ Quantity sold (by weight)
- ✓ Customer name and contact information
- ✓ Other records the Health Authority deem necessary for traceability

4. Meat from Class E Meat Plants

All sales of meat from Class E meat plants are limited to within the regional district in which the meat was produced. Meat from Class E meat plants is **PROHIBITED** to be sold in areas outside of the regional district in which the meat was produced. In addition, meat products from Class E meat plants may only be sold directly to consumers by the licence holder (or his or her immediate family). Retail sales of Class E meat products to secondary food establishments such as restaurants or retail stores are **PROHIBITED**. In addition to the requirements outlined in these Guidelines, the sale of meat from Class E meat plants must meet all requirements of the *BC Meat Inspection Regulations*, including:

- a) Class E meat must be labeled:
 - i. Not Government Inspected. Not for resale. For sale and use only in the regional district of *<insert the name of regional district in which your farm is located>*.
- b) In addition, the following information must also be included on the label:
 - i. The slaughter establishment must be identified including the name and address of the farm or facility and the licence number issued to the farm or facility.
 - ii. If a cut and wrap operation is used to further process the meat, it must also be identified.
 - iii. A description of the contents, including the date that the product was packaged
 - iv. A net weight or volume

Records of all sales of Class E meat must be kept. These records are critical for demonstrating that licence conditions are being followed, and to ensure that clients can be easily contacted in the case of a product recall. Copies of all invoices should also be kept to verify information in the sales record. Critical information to record includes:

- ✓ Type of product
- ✓ Date of sale
- ✓ Quantity sold (by weight)
- ✓ Customer name and contact information
- ✓ Other records the Health Authority deem necessary for traceability

All sales of meat or meat products originating from a Class E meat plant should be completed by the license holder or his or her immediate family. However, sales by other individuals on behalf of the E license holder are permitted provided the following requirements are met:

- ✓ The individual must be able to clearly demonstrate their relationship to the E establishment or licence holder (e.g. employee, family member, etc.).
- ✓ The individual must ensure that all required sales records are being kept, including documentation of accurate customer contact information for traceability purposes (**note: this is required for all E sales regardless of where they occur**).
- ✓ The individual must ensure that a copy of the E establishment's food safety plan and licence is readily available to customers at the Temporary Food Market.

Appendix IV - Application for Sale of Higher Risk Food at Temporary Food Markets

Application Date: _____ Applicant: _____
Mailing Address: _____ City/Postal Code _____
Phone (Day): _____ Phone (Cell): _____
Fax #: _____ E-mail: _____
Applicant's Signature: _____

Name of Market / Event: _____ Date(s) of Event: _____
Location of Market / Event: _____ Business Hours: _____ to _____

NOTE: If selling at multiple markets - list all locations on separate page.

Market Manager: _____ Phone #: _____

Provide a complete list of your food products. List additional foods on separate page if more space needed

_____	_____	_____
_____	_____	_____
_____	_____	_____

Describe your packaging method by checking the applicable boxes as noted below.

☐ Plastic Wrap ☐ Bottle ☐ Pouch ☐ Vacu-packed ☐ Other _____

Have you previously received a Letter of Acceptance or Confirmation for the foods intended to be sold:
☐ No ☐ Yes *If yes, please provide a copy of the letter(s) with your application.*

For EACH food product intended to be sold at the temporary market, please include the following documents with your application form:

- ☐ a list of ingredients
- ☐ a brief description of the preparation and preservation method
- ☐ a sample of your product label
- ☐ for each food item, indicate location of processing/packaging (e.g. commercial establishment **including address**)
- ☐ If you have done quality assurance testing of your products, please provide a copy of your most recent lab reports where applied:
 - ☐ Bacteriology or ☐ pH or ☐ A_w

To be completed by EHO

Received by: _____

Date: _____

Objection: ☐ Yes ☐ No

If yes, attach reason(s).

**Sign or mark with Health Authority stamp
and return a copy of the reviewed
application to the applicant.**

**APPLICATION FORM IS DUE AT LEAST 30 DAYS PRIOR TO THE EVENT
AND SENT TO YOUR LOCAL HEALTH AUTHORITY**

NOTE – Applicants should plan for a 14-day processing turnaround time.

Appendix V - Template for LETTER OF CONFIRMATION

Vendor

Address

Dear Vendor:

Re: Sale of <Product> Prepared at an Approved, Commercial Food Premises for Sale at a Temporary Food Market

We have reviewed the information you provided regarding your proposal to prepare (Name the Products) in (Name the approved, commercial food premises including address) and sell them at Temporary Food Markets. Based on the information provided, this letter confirms that your proposal has been reviewed as per *Temporary Food Market Guideline*. We have no objection to the production of this product for sale at Temporary Food Markets subject to the following conditions:

1. All foods should be properly packaged to protect them from contamination and should also be labeled.
2. No additional processing or preparing of the food is to occur at the market site without written permission from our office.
3. All foods are to be sold from a supervised temporary food market, as defined in the Guideline.
4. There is to be no change to the ingredients or preparation method of this product(s) without written permission from our office.
5. A copy of this letter is to be kept available with you during any sales event confirming that these products have been reviewed by <Health Authority>.
6. This letter does not automatically confer approval to sell the foods to a licensed retail facility.
7. This letter does not confer approval regarding other regulatory agencies' guidelines including, but not limited to, labeling, nutrition labeling, and other requirements.

Please contact the undersigned at <office phone> if you have any questions regarding these conditions.

Yours truly,

Environmental Health Officer
